Road Safety: The Road Zipper™ System

Business Overview

Lindsay was founded in 1955 when Paul Zimmerer began a farm equipment business in Lindsay, Nebraska, with the first successful irrigation towline for rough field terrain. In the 1960s, the first Zimmatic center pivot began irrigating, quickly gaining popularity amongst growers. One of the first pivots built is still in operation today, a testament to the durability and quality that defines every Zimmatic pivot.

Lindsay has grown into a global force for agricultural innovation, helping farmers worldwide provide food, fuel, and fiber for an ever-growing population. The brand has expanded through innovation, working alongside growers to provide the solutions they need to conserve natural resources and maximize yields.

Zimmatic® center pivot and lateral move agricultural irrigation systems joined the product lineup, as well as award-winning FieldNET™ and FieldWISE™ remote irrigation management technology solutions. FieldNET Advisor™ also provides sophisticated agronomic recommendations on when, where, and how much to irrigate, leveraging artificial intelligence to pioneer the farm of the future.

Also a global leader in the transportation industry, Lindsay manufactures products and equipment that improve road safety and keep traffic moving efficiently on the world's roads, bridges, and tunnels through the Road Safety Products and The Road Zipper™ brands, as well as industrial IoT solutions.

Global Impact

500M

500 million gallons of water saved
by growers using Lindsay irrigation equipment.

Revenue: Fiscal Year 2023

\$674M

\$674 million
in total
revenue

\$1.6B

1.6 billion kilowatt hours of energy saved. Equivalent to (approx.)
200,000 passenger vehicles burning 100
million gallons of fuel.
