

 Restrooms

THE FUTURE OF FOOD AND FARMING

CELEBRATION OF

**MODERN
AGRICULTURE**

ON THE NATIONAL MALL
MAY 6 – 8, 2024 | 9AM – 5PM

 For assistance and information about the event:
Call Nick Tindall at **202-701-4287**

AEM
Association of
Equipment Manufacturers

- 1 John Deere**
From autonomy to precision technology, John Deere will showcase the versatility of the agriculture industry and how equipment and technology solutions help farmers feed, fuel and clothe the world more efficiently than ever before.
- 2 CLAAS**
Learn about CLAAS, a family business founded in 1913, and see its state-of-the-art farming technology including our Axion TT Tractor and Marketing Tractor.
- 3 American Seed Trade Association**
Learn about the seed industry's efforts to develop better seed to produce better crops for a better quality of life.
- 4 Solinftec**
Come see Solix, the autonomous solar-powered spray robot built for row crops. Solix enables on-label applications while reducing the amount of chemical used in fields through targeted spraying technology. Stop by our booth to discuss results from last season and learn when and where a Solix will be operating in a field near you.
- 5 EarthOptics**
Learn about EarthOptics Sustainability process using the GroundOwl Sensor Suite to Measures and Map Carbon, which helps farmers make actionable decisions that directly impact carbon storage and have a positive affect on our Climate.
- 6 Common Ground Alliance**
Learn about the safety measures required before ripping, plowing, tiling or in any way excavating on farmland. 811 before every dig protects workers, families, businesses and land.
- 7 Lely**
Come see how we are providing a profitable, sustainable, and enjoyable future in farming and see our innovations in the dairy space.
- 8 DeLaval**
Learn about DeLaval's efforts in pioneering advancements in dairy, including the introduction of cloud-based data, artificial intelligence and machine learning to make sustainable food production possible.
- 9 Boumatic**
Learn about a modern day dairy farm and the tools we provide to make them successful, focusing on milking cows for the life of the dairy farmer and their success.
- 10 KRONE**
Our booth will educate people about how the latest technology from KRONE can reduce transportation costs by putting 25% more crop in every bale made from the Gen 5 baler. We will have toy tractors and balers for the children to play with and a "box" display of scrap ends of twine to demonstrate what our baler does NOT leave in the field.
- 11 JCB**
Learn about the fastest production tractor in the world, alongside Krone's new BiG Pack Generation 5 Baler, model 1290 HDP VC. We'll have have a children's play and learn area where they can interact with scale models of the tractor and baler.
- 12 Case IH**
Learn about high powered tractors with enabling LiDAR technology to perform automation for baling operations.
- 13 International Fresh Produce Association**
Taste and Experience The Joy of Fresh from Farm to Fork! Learn about the fresh fruit, vegetable and floral supply chain and our impact on creating a vibrant, sustainable future for all.
- 14 Kubota**
Learn about high-quality equipment for farmers, homeowners, builders and dreamers, along with Kubota's Geared to Give program in partnership with the Farmer Veteran Coalition.
- 15 Great Plains Ag**
Learn what defines true vertical tillage and why it is a critical part of a solid foundation – even to a no-till system – and how cover crops are used to benefit soil health.
- 15 Montag Manufacturing, Inc.**
Learn how our products assist with the sustainability of agriculture by banding fertilizer for the reduction of fertilizer use and reduction of runoff and with the ability to apply seeds for cover crops to enhance soil quality and health.
- 16 Kuhn North America**
Come see the Gladiator® Strip-Till System, which provides a conservation tillage approach only tilling 33% of the land while preparing an ideal soil environment for crop production.
- 16 Topcon**
Learn how Topcon provides sensors and 2 and 3 dimensional controls for Agricultural and Construction applications.
- 17 Association of Equipment Manufacturers**
Learn more about agricultural equipment innovation and technology and the grassroots campaign *I Make America*.
- 18 Engine Technology Forum**
Learn how internal combustion engines play a key role in powering the tractors, machines, and equipment that make farms more productive with fewer inputs, as well as how they are evolving to meet the challenges of a reduced carbon future.
- 19 AGCO**
AGCO's exhibit highlights precision ag and sustainability technologies from its popular brands, including AGCO Power's fuel-flexible CORE engine, Fendt's innovative Momentum planter, Massey Ferguson's new 500R sprayer, and Precision Planting's targeted spray display and Radicle Agronomics, the world's first fully automated soil testing laboratory.
- 20 AEF (Agricultural Industry Electronics Foundation)**
Learn why we are used to develop plug and play interoperability for the farmers/producers to utilize the sustainable practices and return on investment offered through precision agricultural practices and machine functions of the modern machines.
- 21 Arva**
Learn how efforts to incentivize regenerative agricultural practices at the field level to improve grower profits, reduce GHG emissions, and help our corporate clients achieve their ESG commitments. On site we will have demos of our AI platform and examples of farmer success and beneficial environmental outcomes.
- 22 AgGateway**
Learn how we develop the resources and relationships that drive digital connectivity in global agriculture and related industries.
- 23 Netafim**
Learn about the latest technology in precision irrigation, sustainable farming practices, and why these innovative solutions can significantly improve crop yields and water efficiency in agriculture.
- 24 American Society of Agricultural and Biological Engineers (ASABE)**
Learn about how we are accelerating digital and hard technologies to bring innovation, efficiency and sustainability to America's agriculture and natural resources
- 25 USPTO**
As America's Innovation Agency, the U.S. Patent and Trademark Office provides assistance and support to individuals, industry and organizations alike to protect their creative endeavors. Come engage with agency staff to learn more about the role and importance of patents and trademarks in encouraging invention, innovation, entrepreneurship and economic growth in America and globally. Visit us to learn about how to apply for patents and trademarks as well as the many agency resources and programs available to help you protect your ideas!
- 26 Guardian Ag**
Guardian presents the future of agriculture and aviation. Our autonomous spray drone is the first new platform in 75 years enabling safer, more sustainable crop production
- 27 Clean Fuels Alliance America**
Learn the benefits to both agricultural and urban communities of using crop-based fuels in heavy-duty vehicles.
- 28 Field to Market**
Learn how Field to Market tackles the most urgent challenges facing the agricultural value chain by forging pre-competitive collaboration and translating science into action.
- 29 Biomass Harvesters of America**
Learn about U.S. Farmers' commitment to securing a biomass supply chain for the 21st century bioeconomy including sustainable aviation fuels and carbon sequestration.
- 30 NASDA (National Association of State Departments of Agriculture)**
NASDA staff will be present to share resources, outline agriculture policy priorities, and promote engagement with state departments of agriculture. Stop by our booth for a variety of giveaway items and learn how you can get involved with your local state department of agriculture!
- 31 National Agricultural Aviation Association**
NAAA, along with our member Helicopter Applicators Inc. from Gettysburg, PA will inform attendees of what aerial application does for agriculture and consumers and allow them to see a Bell OH-58 Helicopter with spray booms attached that is used for aerial application.
- 32 Wheat Value Chain**
North American Millers' Association / National Association of Wheat Growers / U.S. Wheat Associates / American Bakers Association
Our booth tells the story of wheat production, from field to flour and wheat foods' final destinations around the world. Visitors will gain a better understanding about wheat production and the products that contain wheat, including through an artisan bread display.
- 33 National Pork Producers Council**
Learn about U.S. pig farmers' commitment to sustainability, animal well-being, and providing safe, nutritious pork to families worldwide. Discover the industry's economic impacts and how the National Pork Producers Council advocates for more than 60,000 pig farmers around the country.
- 34 Lindsay**
Learn about the sophistication, importance, and endurance of the mechanized irrigation machines and how they help maximize food production.
- 35 Associated Equipment Distributors**
Visit our booth to discover the critical demand for technicians in today's workforce while experiencing firsthand the cutting-edge technology championed and sold by our members
- 36 Fertilizer Institute**
Learn about the US fertilizer industry and our mission to ensure food production and security for a thriving tomorrow.
- 37 USA Rice**
Hear the findings from the USA Rice Sustainability Report and learn about the industry's 2030 sustainability goals. Understand the U.S.-grown difference and learn about the different domestic rice varieties and types through a hands-on grain display.
- 38 National Corn Growers Association**
Visit with corn growers and NCGA staff to learn how the corn industry invests in innovation and bolsters sustainable practices in agriculture.
- 39 Growth Energy**
Learn more about how today's biofuel producers work with America's farmers to reduce carbon emissions and save consumers money at the pump.
- 40 CropLife America**
Join us for the Pesticide Discussion! We'll be sharing how pesticides support the goal of universally healthy food, healthy people, and a healthy planet. Also, learn about our recently released Life Cycle Assessment conducted by the University of Arkansas!
- 41 Center for Research on Programmable Plant Systems (CROPPS)**
Learn how The Center for Research on Programmable Plant Systems (CROPPS) brings biologists, computer scientists, and engineers together to use plants' natural intercellular communication systems to create more sustainable and climate-resilient crops.
- 42 American Soybean Association/United Soybean Board**
Discover the versatility of soybeans and explore how U.S. soybean farmers are meeting consumer demand while pioneering sustainable solutions for everyday items through U.S. Soy.
- 43 Mahindra**
Learn how Mahindra's farm equipment is engineered to be easy to operate by first-time tractor or side-by-side owners and heavy duty to tackle the tough jobs of rural living, farming and ranching.
- 44 New Holland**
Learn about clean energy, sustainable agriculture, and precision farming technology
- 45 Bluewhite**
Learn how growers can improve their farm's efficiency, effectiveness, and safety by equipping their new or existing tractors with autonomous capabilities.
- 46 American Farm Bureau Federation**
Learn how farmers and ranchers are leading the way in climate-smart practices that reduce emissions, enrich the soil and protect our water and air, all while producing more food, fiber and renewable fuel than ever before. The booth will also feature farmers who will share their sustainability stories and giveaways.
- 47 Agricultural Retailers Association**
Learn more about the services agricultural retailers provide their farmer customers including technical assistance and other tools they need to conserve and maintain the resources provided on farm and improve future operation potential.
- 48 Valley Irrigation**
Learn how center pivot irrigation helps growers increase food production and conserve water worldwide.
- 49 National Hemp Association**
Come see a showcase of hemp's uses in construction materials and car parts.
